Ending family violence by changing social norms that ignore or support violence is our challenge to you. The impact of family violence, for children raised in that environment, who become adolescents are at risk for recreating abusive relationships that they have seen. This violence becomes a ~~%~~breeding ground+for our next generation. We hope to bring awareness in sharing to the Wai-anae Coast about the extent of the problem and that those behaviors are unacceptable. By shrouding the family violence in secrecy, it allows the behavior to continue. ~~%~~NOw more!+
